COMMUNICATION AND DISSEMINATION
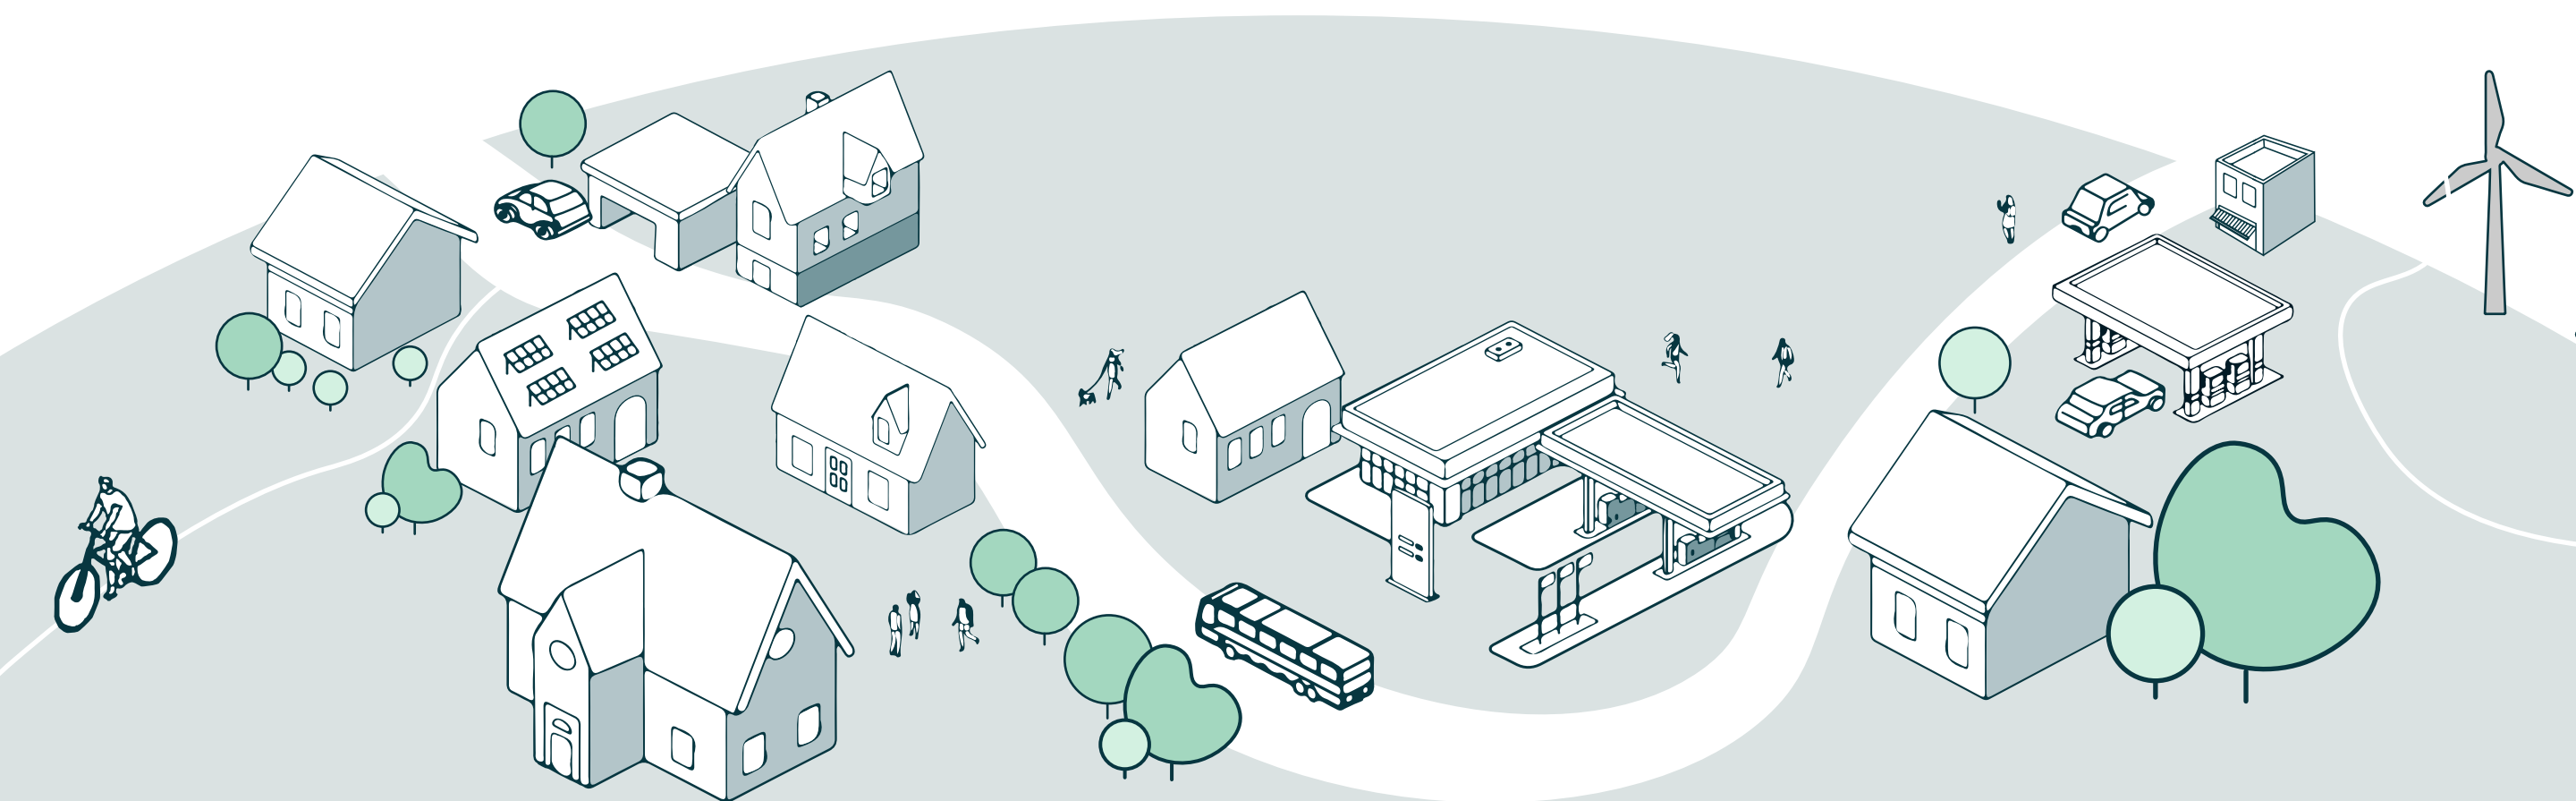

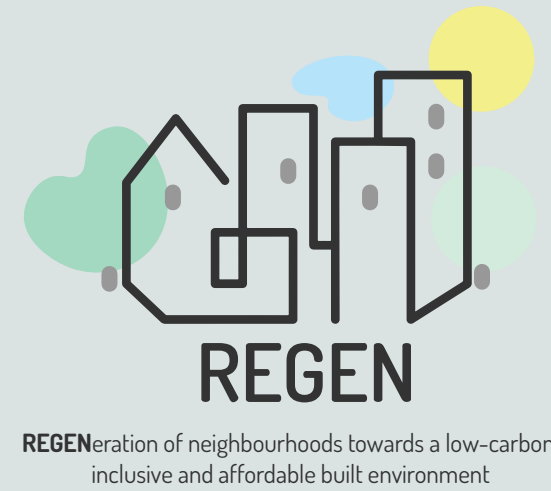

Can you introduce your organization?

R2M Solution France is a consulting company and a key player in European innovation projects, focusing on construction, energy, and ICT. It actively participates in Horizon and LIFE programs, driving research into market-ready solutions and bridges the gap between research and commercialization.
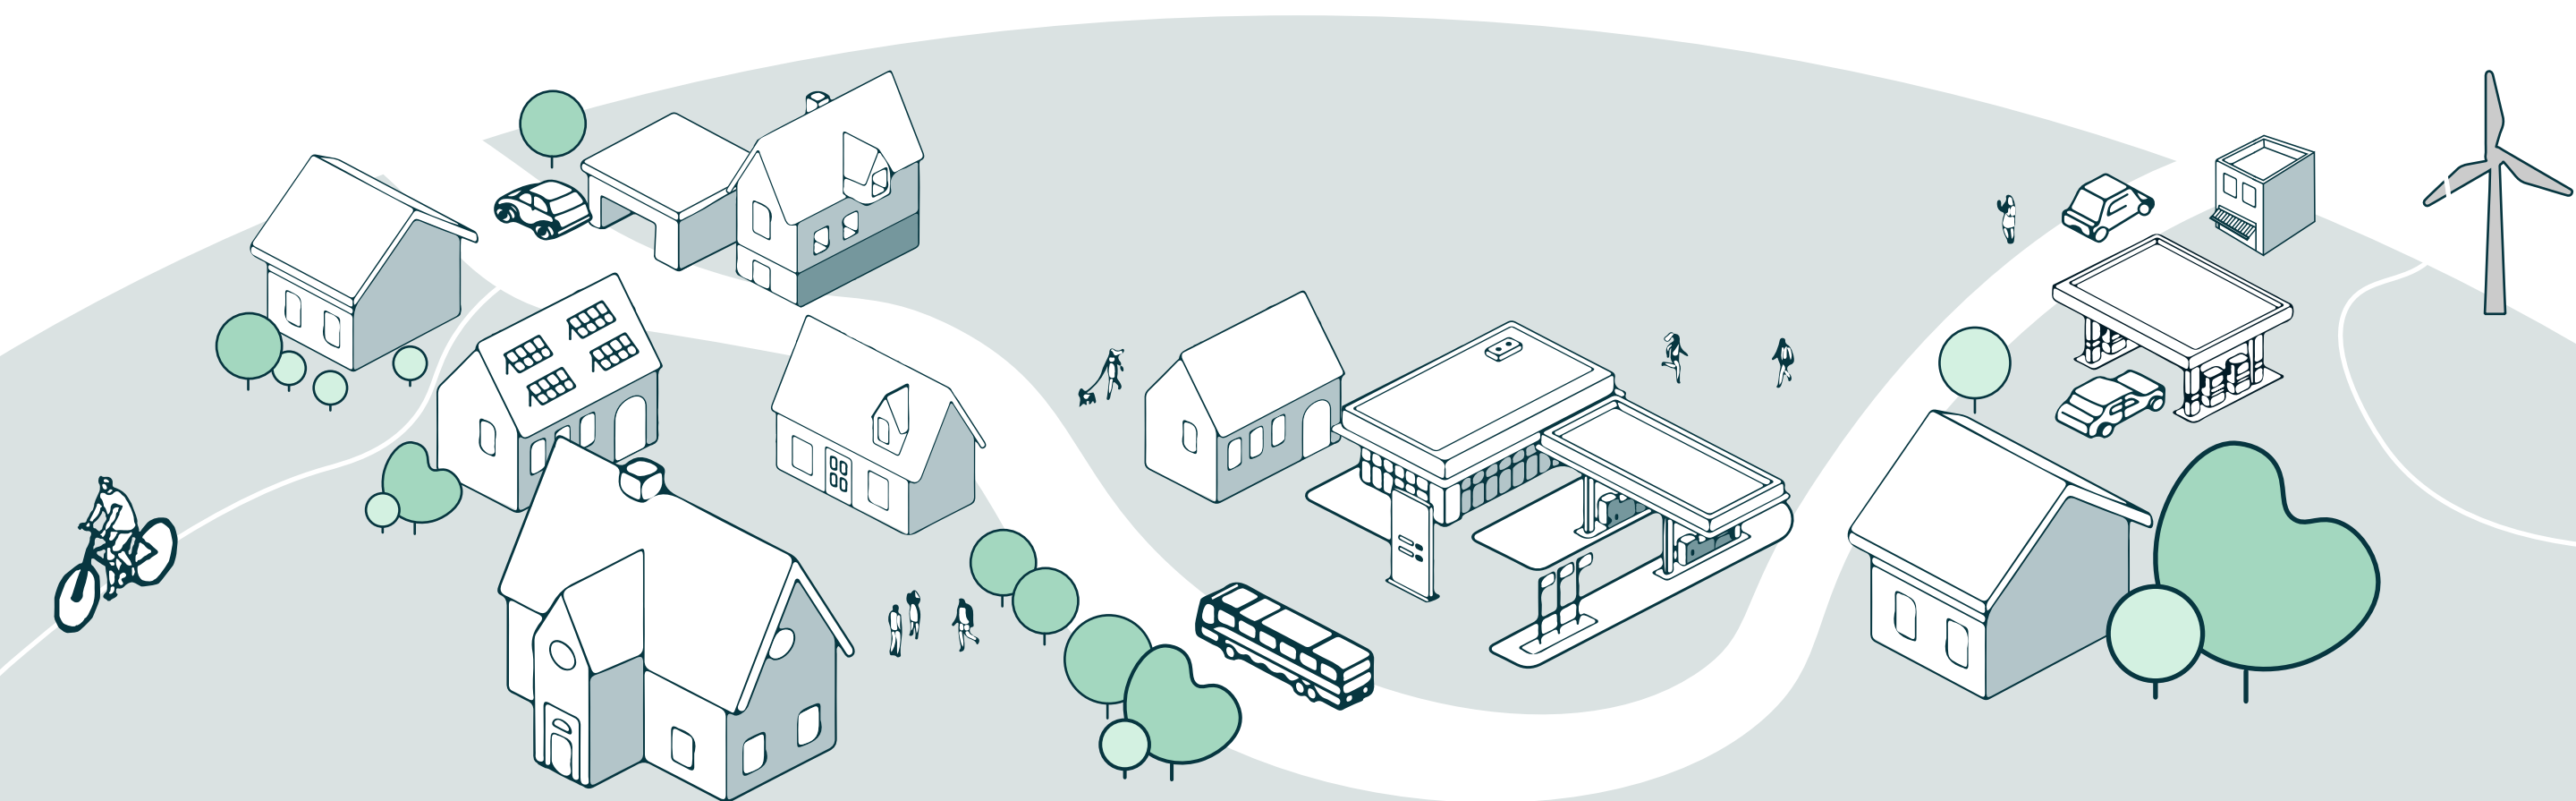

Beyond EU projects, R2M Solution, also active in Italy, Spain and the UK focuses on technology commercialization, smart buildings, renewable energy, and AI-driven automation
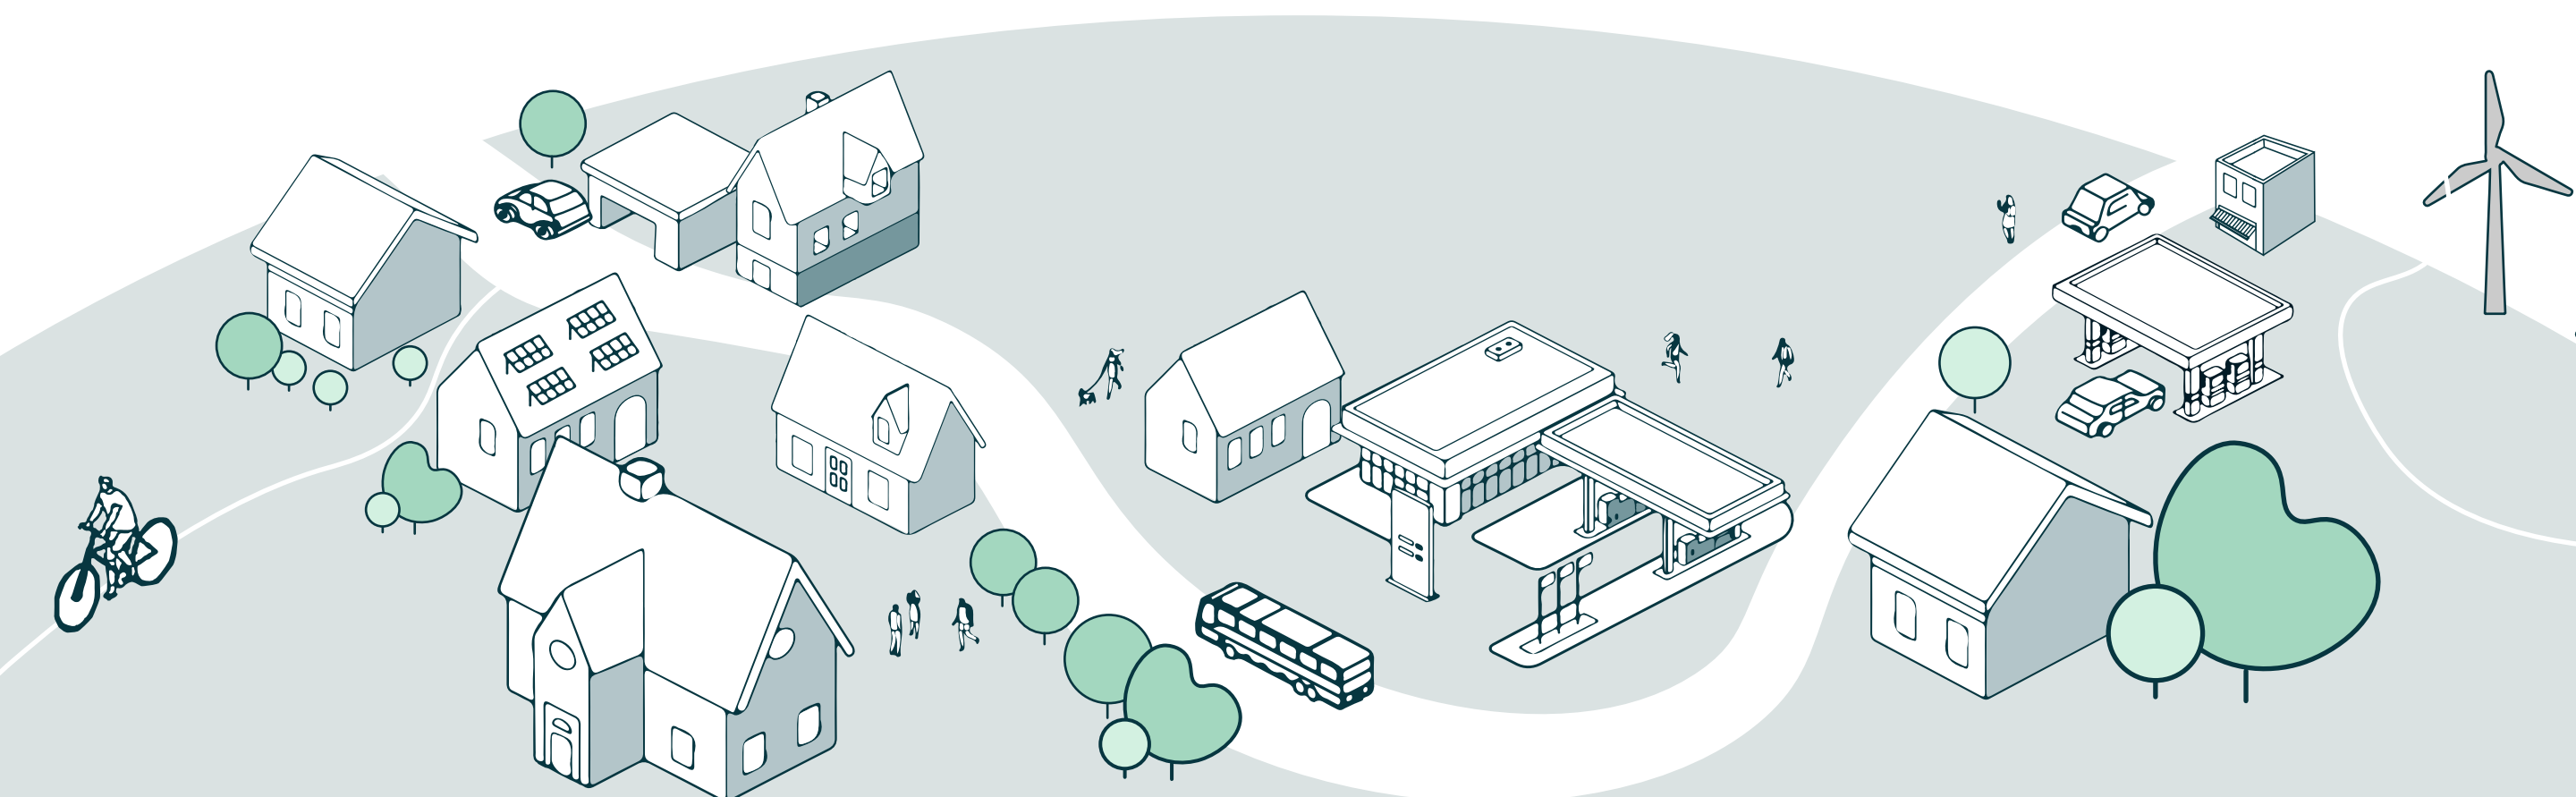

What role will your team play in developing strategies to improve urban planning best practices through neighbourhood regeneration interventions?
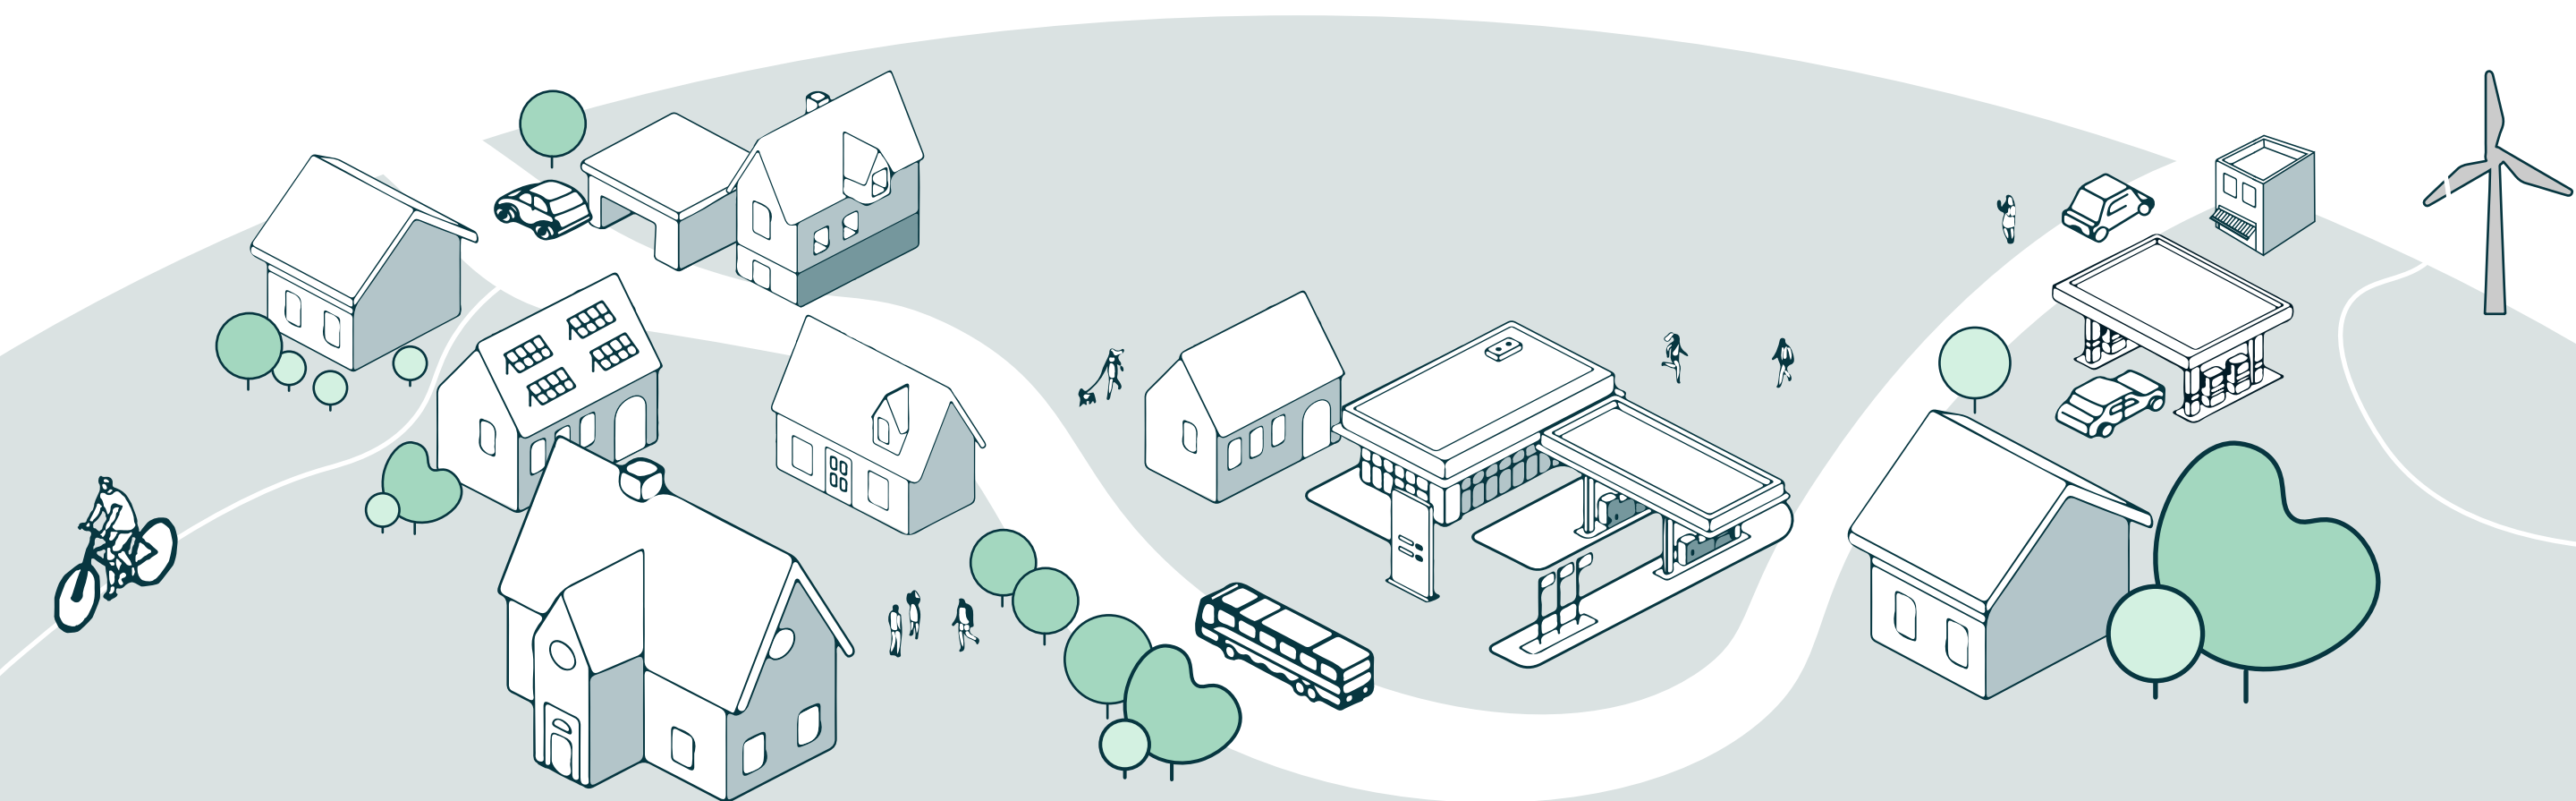

As the leader of our work package, we are ensuring effective exploitation, dissemination, and communication of REGEN's outcomes. We are driving the maturation of key project results and foster stakeholder engagement. Additionally, we are building strategic synergies with EU-funded projects and will support capacity building such as replication opportunities. Through our activities and all partners contribution the objective is to maximize REGEN's visibility and long-term impact on neighborhood regeneration practices.

How do you see your organization's participation in neighbourhood regeneration offices (NRO) and the REGEN toolbox development?

As part of the REGEN project, we are focused on developing practical solutions for neighborhood regeneration. This year, we will assist Neighborhood Regeneration Offices (NROs) by assessing characteristics of their Exploitable Results (ERs). At the same time, we will enhance the technical aspects of the toolbox to improve its usability and effectiveness in real-world applications, driving long-term impact and scalability for neighborhood regeneration efforts.
